- ▼ **Free your IT department from having to constantly develop custom reports**
- ▼ **Installation & training in an afternoon**

Take charge of your business with new PULSE Dashboard™

Real-Time Dashboard
Manage with real-time data instead of yesterday's reports

A popular addition to other software platforms since 2005, PULSE DASHBOARD software is now available for Microsoft Dynamics GP. With this software, you will be able to track critical factors for your business, on-screen and real-time, with detailed analysis with the click of a mouse. PULSE DASHBOARD will revolutionize the way you manage your business.

"Pulse Dashboard gives us real-time insight into our most critical business indicators, letting us see trends that might otherwise be missed. What sets Pulse apart is that it pulls data directly from our ERP database, but lets any employee easily analyse, format, display and print the results customized for our business."

Director, Finance and Operations Fastener Distributor

One-Click Report Writer
Detailed reports on demand— Eliminates costly manual reports

New PULSE DASHBOARD One-Click Report Writer makes it easy for any employee to generate detailed preconfigured or custom business reports in seconds. And since every user accesses the same database, inconsistencies between reports from different departments will be eliminated. PULSE DASHBOARD One-Click Report Writer will increase productivity throughout your business.

Advanced Real-Time Dashboard and One-Click Report Writer for Dynamics GP

▶ PULSE Dashboard adds revolutionary capabilities to your business

- Manage with today's real-time data instead of yesterday's reports
- One-click drill-down to view details
- One-click custom report writer and export to Excel/printer/PDF
- Installation & training in an afternoon

▶ PULSE pinpoints new ways to reduce costs and increase profits

- Focus on shortages that prevent on-time shipping
- Anyone in your company can now generate custom views/reports
- You can now budget sales by customer, salesperson, products, etc.
- Focus on increasing inventory turns to reduce inventory
- Inventory aging pinpoints unused inventory

▶ Specialized dashboards track key metrics in each department

Executive

- Track incoming customer orders and shipments by day and month
- Focus on shipping orders on time
- Track gross margins
- Real-time aging of accounts receivable and accounts payable
- A/R collection notes and follow-up date

Sales & Marketing

- Track sales by customer, territory, rep, distributor, category, etc.
- Budget by customer, product, salesperson, etc.
- View month, quarter, year, last year sales & margin vs. budget

Customer Service / Shipping

- View shortages preventing on-time shipping
- On-time shipping statistics by customer and item
- Credit memos analysis

Inventory Control

- Inventory turns by month by item and ABC class
- Inventory aging
- View month by month on-hand, receipts, usage and turns— drill-down for history
- Keep reorder levels and vendor lead times updated

Production Control

- View raw material & component shortages preventing on-time manufacturing
- View week by week production schedule

Neatly organized visual interface makes navigation quick and efficient

Purchasing

- On-time deliveries and quality performance by vendor
- Aging of open purchase orders
- Pinpoint past due orders and upcoming deliveries

Financial Control

- Month-by-month actual vs. budget vs. last year graphs
- Drill-down to view details
- Department managers can now track controllable expenses real-time
- Cashflow forecast
